SAM Registration	Active
Point of Contact	Matt Priess, Owner/President. (907) 710-3907. matt.bodyops@gmail.com. Submissions: bodyopspartners@gmail.com

2. Statement of Interest

Body Ops Coaching LLC is pleased to submit this quotation for High Performance Optimization (HPO) Services supporting the Preservation of the Force and Family (POTFF) program at the 274th Air Support Operations Squadron, New York Air National Guard, Syracuse, New York. The New York Air National Guard gains readiness and reduced injury risk for its Tactical Air Control Party (TACP) and Special Warfare Mission Support (SWMS) operators from a tactical-athlete human performance capability anchored by an on-staff, BOC-certified Athletic Trainer, paired with a board-certified Physical Therapist / Injury Manager and a remote coaching application that sustains conditioning between drill periods. Body Ops is a veteran-led small business, VetCert-certified SDVOSB and VOSB, founded by a United States Marine Corps veteran, with programs purpose-built for military populations. As a 100% Total Small Business Set-Aside, this requirement is a direct fit: Body Ops qualifies small under NAICS 621340 and brings proven scale of approximately \$2.2M annual revenue, 200+ concurrent clients, and a 12-person delivery and management team. Body Ops will quote all line items, providing the Strength and Conditioning Specialist and the remote application in-house and the licensed Physical Therapist through a New York-licensed teaming partner, with Body Ops accountable for management and quality across every line item.

3. Understanding of the Requirement

For a base year plus one option year, the New York Air National Guard requires three deliverables in support of TACP and SWMS operators at the 274th ASOS, defined in the Performance Work Statement (PWS):

- **CLIN 0001 / 1001:** a full-time HPO Strength and Conditioning Specialist, 2,080 hours annually.
- **CLIN 0002 / 1002:** a Physical Therapist / Injury Manager, 512 hours annually.

- **CLIN 0003 / 1003:** a contractor-provided remote fitness coaching smartphone application for all Drill Status Guardsmen (DSG) not present for full-time duty.

Per the PWS, work is performed on-site at Building 800, 6001 East Molloy Road, Syracuse, New York. Operating hours are 0700 to 1600 Monday through Thursday and every other Friday, plus support on each Regularly Scheduled Drill (RSD) weekend (six in FY2027). The Strength and Conditioning Specialist works 80 hours bi-weekly, using every other 8-hour Friday off to cover 16 hours on each RSD weekend; the Physical Therapist works 8 hours each work week plus 16 hours on each RSD weekend. Telework is not authorized. The period of performance is September 30, 2026 through September 29, 2027 (base) and September 30, 2027 through September 29, 2028 (option).

This is a Combined Synopsis/Solicitation issued as a Request for Quotation under FAR Part 12; the announcement is the only solicitation. Award is evaluated under FAR 52.212-2 on technical acceptability, past performance, and price. Past performance is evaluated through a finalized CPARS evaluation or the Government's Past Performance Questionnaire (PPQ); absent either, evaluation proceeds on technical acceptability and price. The acquisition is Service Contract Act covered, and Wage Determination 2015-4163 Revision 32 (Onondaga County, New York) applies; Body Ops will comply and incorporate it into labor costs.

4. Capability by Contract Line Item

Each required line item maps to a Body Ops capability, in the order of the solicitation.

Requirement	
CLIN 0001 / 1001 - HPO Strength and Conditioning Specialist (2,080 hours/year)	Body Ops provides a full-time, on-site Certified Strength and Conditioning Specialist (CSCS, NSCA) at Building 800, Syracuse, working 80 hours bi-weekly including 16 hours on each Regularly Scheduled Drill (RSD) weekend, for the full 2,080 annual hours. Program design is informed by our on-staff BOC-certified Athletic Trainer for movement screening, injury-aware progressions, and return-to-duty support for TACP and SWMS operators.
CLIN 0002 / 1002 - Physical Therapist / Injury Manager (512 hours/year)	Body Ops provides a licensed Physical Therapist through a New York-licensed teaming partner holding a Doctorate of Physical Therapy, an active state license, and ABPTS board certification as an Orthopedic or Sports Clinical Specialist (O/SCS), working 8 hours each work week plus 16 hours on each RSD weekend for the full 512 annual hours, serving as on-site Injury Manager. Body Ops states this teaming arrangement plainly and remains accountable for management and quality.
CLIN 0003 / 1003 - Remote Fitness Coaching Smart Phone Application (12 Each)	Body Ops provides a contractor-furnished remote coaching smartphone application for all Drill Status Guardsmen not on full-time duty, with login accountability, instant messaging, user fitness and workout logging, real-time monitoring and plan adjustment by the Strength and Conditioning Specialist, and readiness and injury-recovery tracking visible to the Airman, squadron leadership, and the coach, as specified in PWS 5.7.

5. Personnel Qualifications and Compliance

- **Strength and Conditioning Specialist:** holds a current Certified Strength and Conditioning Specialist (CSCS) credential through the National Strength and Conditioning Association, with a degree in a human-performance-related field. Soft-tissue credentials (for example Licensed Massage Therapist) are preferred and will be prioritized in selection. The Specialist is supported by Body Ops' on-staff BOC-certified Athletic Trainer, who informs program design and safe modifications, reducing injury risk and supporting return to duty.
- **Physical Therapist / Injury Manager (teaming):** provided through a New York-licensed teaming partner who holds a Doctorate of Physical Therapy, a valid state physical therapy license, and ABPTS board certification as an Orthopedic or Sports Clinical Specialist (O/SCS), as the PWS requires. Body Ops does not claim in-house clinical or licensed treatment capability and will document the teaming mechanism for the Contracting Officer.
- **Safety credentials:** personnel maintain current CPR/AED and First Aid certification (American Red Cross or American Heart Association), complete Antiterrorism Level I Awareness training, and meet installation access and security requirements for the 274th ASOS.
- **Wage and labor compliance:** all covered labor is priced and staffed in compliance with Wage Determination 2015-4163 Revision 32 (Onondaga County, NY) and Service Contract Act requirements.

6. Operations, Scheduling and Quality Control

- **Management:** a designated Contract Manager and alternate, named in writing to the Contracting Officer, own communication, scheduling, and performance across all line items, working through the COR (or KO) and giving the Government a single accountable point of contact.
- **On-site staffing and continuity:** Body Ops staffs the full-time Strength and Conditioning Specialist and the part-time Physical Therapist on-site at Building 800 through local hire, relocation, or teaming, maintaining the 2,080 and 512 annual hours and full RSD-weekend coverage through the base and option years, with a substitute and backup-staffing plan to prevent coverage gaps. The remote application sustains programming for Drill Status Guardsmen between drill periods.
- **Quality control and deliverables:** Body Ops submits a Quality Control plan within 10 calendar days of award, provides quarterly injury reports identifying individual operator injuries and rehab strategies, supports Operator Fitness Test (OFT) tracking and myFitness reporting, and gives prompt notification of any staffing, scheduling, or performance issue, drawing on a 12-person team across coaching, fulfillment, client success, and operations.

7. Relevant Experience

- **Track record:** 15+ years of fitness, strength and conditioning, and human-performance operations, scaled to approximately \$2.2M annual revenue, 200+ concurrent clients, and a 12-person team.
- **Military fit:** founder is a U.S. Marine Corps veteran; programs are purpose-built for military and veteran populations, including injury-aware training and return-to-duty progressions aligned to the tactical-athlete model in this PWS.
- **Staffing infrastructure:** demonstrated capacity to recruit, contract, schedule, and supervise coaching staff and teaming partners, the backbone for placing and sustaining on-site specialists at a National Guard installation.

8. Past Performance

Body Ops will submit completed Past Performance Questionnaires (PPQ) using the Government's attached form, drawn from relevant commercial human-performance and coaching engagements (200+ concurrent clients; multi-year program delivery), framed for transfer to this military readiness requirement. We understand that, absent a CPARS evaluation or a submitted PPQ, evaluation proceeds on technical acceptability and price.

9. Price Quotation

PRICING TO BE FINALIZED BY BODY OPS PRIOR TO SUBMISSION. Unit prices are set by Matt Priess against Wage Determination 2015-4163 Rev 32, payroll burden and fringe, the Physical Therapist teaming-partner quote, and the application platform cost. Body Ops will quote all six line items (base CLINs 0001 to 0003 and option CLINs 1001 to 1003).

Stated assumption (CLIN 0003 / 1003): the solicitation lists the application as "12 Each" and does not publish a Drill Status Guardsman headcount. Body Ops reads "12 Each" as 12 monthly periods of one enterprise application covering all eligible DSG across the 12-month period of performance, and quotes CLIN 0003 / 1003 as a flat monthly application service (one application covering all DSG, not a per-individual license). A clarification request on the unit basis and the estimated DSG population has been submitted to the Contracting Officer; Body Ops will confirm or revise this line upon the Government's response.

Line Item	
CLIN 0001 / 1001 - S&C Specialist (2,080 hrs)	Firm fixed unit price per hour x 2,080 (to be finalized; WD 2015-4163 Rev 32 compliant)
CLIN 0002 / 1002 - Physical Therapist (512 hrs)	Firm fixed unit price per hour x 512 (set from teaming-partner quote)
CLIN 0003 / 1003 - Remote App (12 Each)	Firm fixed monthly application price x 12 (flat enterprise license covering all DSG, per stated assumption)

10. Closing

Body Ops Coaching LLC appreciates the opportunity to quote and requests: (1) confirmation of receipt of this quotation; (2) a response to the submitted clarification on CLIN 0003; and (3) the opportunity to provide any additional information the Contracting Officer may require. Body Ops is ready to begin performance at the start of the period of performance and is committed to the readiness of the TACP and SWMS operators of the 274th Air Support Operations Squadron.

Respectfully submitted,

Matt Priess

Owner / President, Body Ops Coaching LLC
